THIS MONTH'S TOPIC

STEP INTO NATURE, SUMMER EDITION

As the weather warms up, the sun shines brighter and it is light outside for longer each day. These environmental changes make it more enticing to spend time outdoors. Perhaps you find yourself staring out the window, distracted from your work tasks. Don't fight the urge to step outside! Give in to your wandering mind, take a break in the sunshine, and reap the benefits of being outdoors in the summertime. You may be familiar with a quote from Hippocrates, "Nature itself is the best physician." Whether you take a walk around your block, sit in the shade under a tree, or take a hike through the woods, spending time outdoors is good for your health.

MARTIN-GATTON COLLEGE OF AGRICULTURE, FOOD AND ENVIRONMENT

Educational programs of Kentucky Cooperative Extension serve all people regardless of economic or social status and will not discriminate on the basis of race, color, ethnic origin, national origin, creed, religion, political belief, sex, sexual orientation, gender identity, gender expression, pregnancy, marital status, genetic information, age, veteran status, physical or mental disability or reprisal or retaliation for prior civil rights activity. Reasonable accommodation of disability may be available with prior notice. Program information may be made available in languages other than English. University of Kentucky, Kentucky State University, U.S. Department of Agriculture, and Kentucky Counties, Cooperating. Lexington, KY 40506

When you are having a bad day, feel discouraged, or feel generally down, try going outside. You can relieve stress by doing exercise or outdoor chores, or simply standing, sitting, or taking a slow walk.

➔ Continued from the previous page

There are both mental and physical benefits to spending time outdoors during the summer. Studies have shown that people enjoy being outside in the summer, and being outdoors provides good motivation to be physically active. People who exercise outdoors are more likely to be active for a longer time and enjoy it more than those who exercise indoors. Additionally, there are many activities to do in the summer outdoors. From walking, hiking, or running, to gardening, doing yard work, playing sports, and more, there are many ways to be active in the great outdoors whether you live in an urban or rural area.

Another physical benefit of spending time outdoors is the quality of air that you breathe in. Overall, air quality outdoors is typically better than that inside. When you exercise, your body needs more air, and you breathe more deeply. This provides extra oxygen to your body and breathing outdoors tends to reduce the amount of toxins that you take in through the air. Breathing deeply helps you to relax, lowering your stress levels, cortisol, and heart rate. All of these contribute to overall heart health, reducing and managing chronic diseases such as high cholesterol, blood pressure, and heart disease. Additionally, being outdoors awakens your senses, helping you to enjoy the atmosphere outdoors: the sights, smells, sounds, tastes, and textures around you.

Tuning into your senses outdoors also has mental health benefits. Spending time outside reduces stress levels, decreases feelings of depression and anxiety, and helps you to feel more regulated. Spending time outside has shown to help people recover from trauma faster as well. When you are having a bad day, feel discouraged, or feel generally down, try going outside. You can relieve stress by doing exercise or outdoor chores, or simply standing, sitting, or taking a slow walk.

Summer weather tends to make spending

time outside enjoyable, but there are some precautions you should take as well. If you are going to spend time out in the sun, remember to wear protective clothing or sunscreen, sunglasses or hat, and drink plenty of water to stay hydrated. Your body will appreciate the additional vitamin D, but you do not want to overexpose your skin to damage from the sun.
